

Health

Tissue Viability and Wound Management (Distance Learning) (Masters)

2016-17

University of
HUDDERSFIELD
Inspiring tomorrow's professionals

Course available at
Huddersfield

This specialist skills and post registration short course may be of interest to those health professionals who would like to gain or enhance their knowledge of tissue viability and wound management.

The course offers you the opportunity to develop an understanding of a complex body of knowledge in relation to tissue viability and wound management. Evidence of personal responsibility and decision making in complex and unpredictable circumstances will be an expectation.

You will develop skills to critically discuss, critically explore and critically analyse existing and developing theories and concepts that underpin wound healing and tissue viability and will understand the political; local; national and international drivers that can affect resource management.

You must identify a mentor in practice prior to commencing the module.

Start date(s)
00-00-0000

Course Content

Teaching and assessment

You will be taught via the University's virtual learning environment. You do not need to attend the University. Assessment will include a portfolio (pass/refer/fail) and a written report (100% of marks). Both elements must be satisfactorily completed to pass the course.

Your module specification/course handbook will provide full details of the assessment criteria applying to your course.

Feedback (usually written) is normally provided on all coursework submissions within three term time weeks' unless the submission was made towards the end of the session in which case feedback would be available on request after the formal publication of results.

Feedback on exam performance/final coursework is available on request after the publication of results.

Huddersfield is the only University where 100% of the teaching staff are Fellows of the Higher Education Academy.*

∗permanent staff, after probation: some recently appointed colleagues will only obtain recognition in the months after their arrival in Huddersfield, once they have started teaching.

Placements

Depending on your current work environment you may be able to complete the portfolio but you may also benefit from arranging additional clinical experiences elsewhere. You will work alongside your mentor in order to achieve your learning outcomes and agree with them what additional experience you require. You may be required to visit specialist nurses, specialist clinics and medical staff in order to develop your knowledge and skills base. Such visits will be organised individually between you and your mentor.

Career opportunities

This short course will assist you to meet the specialist skills and post-registration development requirements stipulated by your employer/professional regulator.

Other Information

The University of Huddersfield operates an attendance monitoring system. Further details can be found in the Attendance Monitoring

Policy|<http://www.hud.ac.uk/media/universityofhuddersfield/content2013/services/registry/Attendance%20Monitoring.pdf>.

Entry requirements

You must:

- * Be a registered health professional.
- * Registered with an appropriate governing body.
- * Be currently working in a healthcare environment in which you are caring for clients with tissue viability/wound conditions.
- * Have an Honours degree or evidence of degree level study.
- * Be able to identify a suitable mentor in clinical practice who will support you throughout the duration of the course. Part of the assessment for this course is the completion of an on-line practice based portfolio, this portfolio is assessed by your mentor. Therefore the mentor must be a recognised expert/specialist in the field of wound care.

For applicants whose first language or language of instruction is not English you will need to meet the minimum requirements of an English Language qualification. The minimum of IELTS 6.5 overall with no element lower than 6.0, will be considered acceptable, or equivalent.

In order to successfully study this distance learning course, you must also have:

- * access to a computer with a reliable internet connection.
- * the ability to access and use online study guidance and support.
- * appropriate video and audio devices so that you can participate in webinar tutorials.
